

TF1700 (2.5 METRE) AND TF1701 (2.0 METRE)

UNIVERSAL EXPEDITION AWNING

FITTING INSTRUCTIONS

Both the TF1700 & TF1701 are identical bar the 0.5 metre length difference, with the longer TF1700 being suitable for longer vehicles, roof rack length allowing.

On opening the zipped grey case, you'll find that the extruded aluminium mounting system is permanently attached to the case. In addition, enclosed will be a grey bag containing the fitting kit (selection of M6 bolts and Nyloc nuts), a 10mm ratchet spanner and two guy ropes with ground pegs.

On the rear of the base extruded aluminium mounting are two T-Slot grooves running the length of the mounting, along which you can slide the M6 hex head bolts to any position. This mounting is attached to the vehicle horizontally and attached to roof rack legs etc. It's not recommended to mount the awning using the gutter only as the weight of the awning will deform the gutter.

The T-Slot grooves are 48mm apart, measured centre to centre. You'll need to drill 2 x 6mm holes in each upright roof rack leg, each 48mm apart – please note the importance of ensuring that every hole is not only the correct distance apart from each other but that each pair of holes in every leg is in line horizontally with each other on every supporting roof rack leg.

Once the holes are drilled, slide an equal number of bolts in to each of the upper and lower T-Slot grooves, space them out to match the roof rack leg spacing, offer up the awning base to the legs, ensure the threaded ends of the bolts protrudes through its relevant hole and fasten in place with the Nyloc nuts and ratchet spanner provided.

WARRANTY & DISCLAIMER - TerrafirMa products are warranted free from defects in materials and workmanship for a period of 12 months from the date of retail invoice. TerrafirMa does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws. This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind. Damage or defects caused by collision, alteration, improper installation, road hazards, adverse conditions or usage for any other purpose other than normal private usage are not covered by this warranty. TerrafirMa shall not be liable for any other claim relating to the use of the product and any indirect special or consequential damage or injury to any person, company or other entity. All claims must be accompanied by the original retail invoice and should be submitted to the supplying Allmakes 4x4/TerrafirMa distributor. This warranty covers only the replacement of the product or part concerned. The decision remains solely at the discretion of Allmakes Ltd. The information contained in this catalogue was correct at the time of going to press. Allmakes/TerrafirMa and its associated companies reserve the right to alter the range and any product specifications without notice. Always consult your Allmakes/TerrafirMa distributor for the latest product information and specifications. The TerrafirMa range of products is constantly being evaluated for enhancement and improvement to make sure the level of quality and performance is as expected.

Once attached to the vehicle securely, there are two extendable aluminium poles in the awning base attached to the vehicle, these swivel out horizontally at 90 degrees to the vehicle and connect to the secondary extruded aluminium section at the outer end of the awning. In the secondary outer section are two more extendable aluminium poles, both of which swivel out 90 degrees vertically to the ground. These two poles are each restrained by the guy ropes and ground pegs provided.
